- Minimal space requirements

UNIVERSAL PILL DISPENSER

A COMPACT SYSTEM TO ENHANCE YOUR AUTOMATED DOSE PREPARATION WORKFLOW

Pour les pharmaciens qui souhaitent automatiser leur production de piluliers sous forme d'alvéoles monodoses ou multidoses et proposer une véritable alternative aux sachets-doses.

KEY BENEFITS OF THE AUTOMATIC PILL FILLER

- Fully compatible with the main blister support formats on the market.
- Enhanced filling process thanks to 100% traceability, integrated PDA stock management, and intelligent medication canister recognition.
- Preparation time optimization through efficient filling cycles, smart prescription handling, and seamless adaptation to pharmacy workflows.
- Up to 30% time savings on a complete production cycle.
- Interface compatibility with pharmacy management software (LGO) and nursing home care software.
- Easy integration due to its ultra-compact design.
- Ergonomic workstation setup options available.
- Flexible financing solutions to ensure an attractive investment.
