## HOSPITAL SOLUTIONS

### SAFECRUSH AUTOMATIC PILL CRUSHER

- Effortless fine powder crushing
- Eliminates Musculoskeletal Disorders
- Prevents inhalation of toxic dust
- Time-saving: crushes while performing other tasks

**NEW**

# THE SAFECRUSH AUTOMATIC PILL CRUSHER

ENHANCING THE WELL-BEING OF BOTH PATIENTS AND HEALTHCARE PROFESSIONALS

Developed through a collaboration between Health Canada and nurses from British Columbia, the SafeCrush pill crusher is the result of years of research aimed at addressing all the challenges associated with manual pill crushing. SafeCrush offers an effective response:

- To the risks healthcare professionals face during manual pill crushing.
- To iatrogenic risks and cross-contamination for both patients and caregivers.
- To the difficulties encountered by patients with swallowing disorders.
- To the risk of tube clogging during enteral medication administration.

## PREVENTION & WELL-BEING OF HEALTHCARE STAFF

- No physical effort required: simply press a button
- Eliminates Musculoskeletal Disorders (MSDs)
- Prevents microtraumatic postures
- Zero inhalation of toxic dust during crushing
- Saves time thanks to background operation
- Improves working conditions

## SAFETY & WELL-BEING OF PATIENTS

- Produces a very fine, homogeneous powder to ease medication intake
- The cup doubles as a container for mixing with food (water / gelled water / applesauce)
- Reduces medication loss—no need to transfer between containers
- Eliminates noise from manual crushers
- Improves treatment adherence and respects patient comfort

## TECHNICAL SPECIFICATIONS

- Complete kit includes: 1 SafeCrush pill crusher, 1 removable 12V battery, and 1 charger with power cord
- CE certified
- Weight: 5.11 kg
- Dimensions: 240 x 164 x H 253 mm
- 3-year return-to-base warranty
- Graduated cups (packs of 1000)
- Available for purchase or through our free placement program (subject to conditions)
